- Precision detail attachment and comb included
- Textured handle with on/off sliding switch
- Fully washable for easy cleaning
- AA battery included in the pack

Built to last

- Soft pouch included
- Built to last

Highlights

Easily trim unwanted hair

Gently remove unwanted nose and ear hair efficiently. Ensure nostrils are clean before use, carefully insert the trimmer inside your nose no more than 0.5cm and slowly circulate it. When trimming ear hair, ensure ears are free of wax. For brow hair, slide one of the two combs (3 and 5 mm) into the grooves and trim with light pressure moving against the hair growth for an even cut to the length you want. For detail trimming, use with or without the detail trimmer comb included in the pack. Adjust the angle to trim, shape and define edges of your beard or goatee with the precision styler head.

Protective Guard System

Our Protective Guard System provides a cover over the blades designed to ensure they will never be in touch with your skin while safely guiding your hair towards the cutting element. The Protective Guard has been engineered to make trimming comfortable and safe, minimizing missed hair whilst protecting against hair pulling, tugging or nicks and cuts.

PrecisionTrim technology

Our innovative cutter is dual-sided to ensure all hair are cut quickly and effortlessly from any angle and in any direction. The blades are made of durable stainless steel and designed to last.

Precision detail trimming

The detail trimmer helps you trim and shape your facial style (stubble, goatee, sideburns, neckline or mustache) with high control and visibility.

Easy handling

Easily turn on/off your device with one hand. The textured handle gives you the best hold, even when wet, for better control when you operate your trimmer.

Fully washable

This trimmer is water resistant, so it is easy to clean: just rinse it under the tap.

Battery operated

This trimmer runs on one AA battery that is included in the box, so your trimmer is ready to use right away. To change the battery, open the device by gently turning the bottom part to the left. Pull the bottom towards yourself to reach the battery compartment.

Easy storage

Use the convenient pouch for storage or travel. It holds your trimmer and all its accessories when you're on the go.
