

Toaster

BXTO900E

Product code: ES9600060B

EAN Code: 8432406600065

Title:

Black + Decker – BXTO900E. 900W stainless steel toaster with 2 extra wide slots 42x137 mm. 7 browning levels Self-centring system Functions: Stop, Reheat and Defrost.

Main selling point:

Start your day in the crispiest way with the Black and Decker BXTO900E toaster. Its extra wide slots allow you to toast all kinds of bread and slices easily and quickly thanks to its 900 W power.

The BXTO900E toaster has 7 browning levels to produce the type of toast you want, whether lightly or heavily toasted. The toaster also includes 3 extras functions, which allow you to: Cancel, Reheat and Defrost. The Reheat function allows you to heat previously made toast. The Defrost function allows you to toast frozen bread without it burning. And with the Cancel function you can stop the toaster whenever you like.

To guarantee perfect toast, the toaster has a self-centring system that centres the bread inside the toaster to produce more evenly toasted bread, on both sides. It also has LED indicators to constantly display the function being used at that moment.

To keep the toaster clean, the BXTO900E includes a removable crumb tray that catches any crumbs produced while toasting. Its easily removable tray makes cleaning easier and prevents any crumbs from burning during subsequent use.

Its elegant mark-resistant, stainless steel design will look perfect in your kitchen. The base of the toaster includes a housing for the cable and non-slip feet to ensure greater stability.

Main selling points developed:

- **3 FUNCTIONS:** The toaster has 3 different functions: Cancel, the toasting process stops and the toast pops up; Reheat, to heat previously made toast; and Defrost, to toast frozen bread without burning it.
- **7 BROWNING LEVELS:** You can choose between 7 different browning levels to suit all needs and types of bread. Select the browning level that best suits you.
- **EXTRA WIDE SLOTS AND SELF-CENTRING SYSTEM:** 2 extra wide slots, 42 x 137 mm, suitable for all types of bread and slices. The toaster's self-centring system automatically positions the bread in the centre, guaranteeing fully, evenly toasted bread.
- **CRUMB TRAY:** The toaster includes a practical pull-out crumb tray for easy cleaning. This stops bread crumbs from sticking to the bottom of the toaster and burning during subsequent uses.
- **DESIGN:** Elegant, robust design with mark-resistant surface. Its finishes will match your kitchen perfectly. The base of the toaster has a housing for the cable and non-slip feet to ensure greater stability.
