- Easy instructions and inspiration with the Coffee+ App
- Up to 5000 cups* without descaling thanks to Aquaclean

*Based on consumer testing in Germany comparing global leading One Touch (Coffee + Milk) Full Automatic Espresso Machines (2023).

Highlights

5 hot & refreshing drinks

At one touch, enjoy popular coffee recipes, from classic espresso, regular black coffee, espresso lungo to iced coffee, with the perfect crema, aroma and temperature. Hot water for tea is also available. Our unique brewing system perfectly extracts the beans flavors with a slower flow rate and at lower temperature. Add ice cubes to your drink and enjoy a delicious iced-coffee, with no compromise on coffee intensity.

Easy coffee selection and customization

Easily select your favorite drinks thanks to the modern touch screen display with colored icons. Adjust your coffee your way with the My Coffee Choice function: choose your preferred coffee strength, length, and milk froth level, just to your taste.

Milk frothing made easy

Easily prepare your favorite milk-based coffees in only 2 steps. The classic milk frother prepares thick-frothed milk to which you can add espresso and enjoy a delicious cappuccino. You can even prepare hot milk for your hot chocolates.

Quiet coffee making with SilentBrew

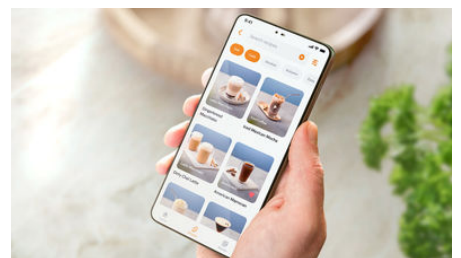

Our patented SilentBrew technology reduces machine sounds so you can enjoy the experience of brewing aromatic coffee more. Using sound shielding and quiet grinding, our machines make 40% less noise than earlier models and come with a Quiet Mark certification.

100% ceramic grinders

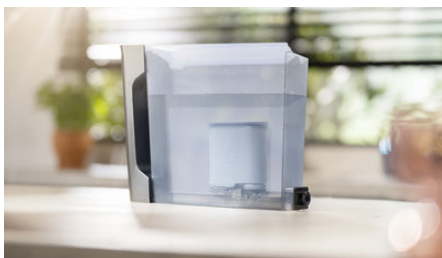

Bring out the full flavour of your coffee with our hard-wearing ceramic grinder. The durable ceramic grinder can be adjusted in 12 steps, from fine to coarse grindings.

Effortless, inspired coffee with Coffee+ App

Discover all there is to know about your fully automatic espresso machine and unlock a world of unlimited inspiration of café-like recipes with the Coffee+ app.

AquaClean filter

By changing the filter after being prompted by the machine, you will not need to descale your machine for up to 5000 cups*, while enjoying clear and purified water.
