Highlights

Flowing water

Flowing water appeals to their wild side and encourages them to drink more water.

Filters

Our multi-layer filtration system has an activated carbon filter and ion exchange to keep their water fresh and clean.

Safety

If the water runs too low, the pump will shut off, ensuring no damage occurs.

Easy clean

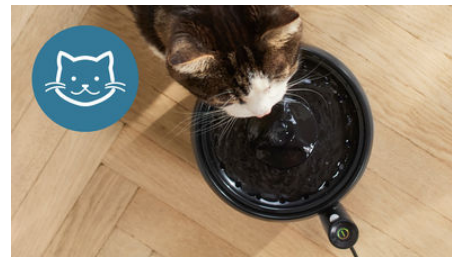

Simply rinse the parts, maintaining the hygiene standards that your cat expects.

Easy refill

Easily monitor the water level and refill when needed.

Whisker friendly, the purr-fect fit

Our bowl is wide enough for whiskers and is at the perfect angle and height to drink from.

Whisper quiet

You won't be disturbed by any noise, and neither will your cat.

Fresh water

Water is automatically recycled every 30 mins or 2 hours, to prevent build-up so your cat has fresh and clean drinking water.

2.2 L

To keep them hydrated.
