

Your kitchen, designed your way

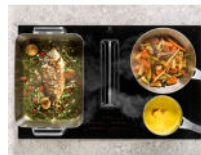

The 800 Bridge Induction Hob with eXTRACTOR allows for more placement options and greater design freedom in the kitchen. Now your extractor doesn't need to sit above the hob, letting you design your kitchen your way, without restrictions.

Product Benefits & Features

Kitchen Design Freedom – free up space without restrictions

Free up space and let your design ideas flourish with Kitchen Design Freedom. Install your extractor hob where you like, as it replaces the need for a hanging hood above your cooking space. Experience more freedom in your kitchen.

Cook more by combining two zones with Double Bridge

With Double Bridge, you can combine two aligned cooking zones to create one larger cooking area. Best of all, you have this function on both sides of your hob. Now you can accommodate larger pans to make more of the meals you love.

Clean your kitchen air quietly with Breeze

The Breeze function refreshes the air in your kitchen at a low noise level when you have finished cooking. Now you can relax or entertain in a fume-free, enjoyable environment after your meal.

The 2-in-1 Filter for fresher kitchen air

The 2-in-1 Filter includes both a charcoal and grease filter to help keep kitchen air fresh. The removable filter can be easily cleaned in the dishwasher and regenerated in the oven for prolonged use.

The extractor adjusts automatically with Hob2Hood®

Keep your mind on your cooking with an extractor that adjusts automatically as you raise or lower the power level. Hob2Hood® technology enables you to focus on your food while your hob and extractor seamlessly work for you.
