

Superior suction with PowerCyclone 12 technology, TriActive Smart nozzle adapts to your floor type, Longest runtime - 80min on eco setting(1), Includes Aqua Module to mop, Max versatility thanks to handheld & 5 LED tools

XC7057/01

Highlights

Superior suction on all floors

The PowerCyclone 12 & PowerBlade digital motor work together to generate great airflow speed (up to 1080 L/min(4)) energy-efficiently. The PowerCyclone 12 technology is inspired by aviation engineering for exceptional cleaning of dust and dirt. This results in powerful cleaning on all floors without running out of battery.

Triactive Smart LED Nozzle

The TriActive Smart LED nozzle is engineered with triple action to clean up to 99.9%(5) of dust and dirt in a single stroke on multiple floor types. Auto setting adjusts suction power based on your floor type, and lets you customize the brightness of the LED lights so you can see even the smallest speck of dust. If you prefer, you can also choose from 3 different speed modes that you fully control. The nozzle cleans up to 0mm close to edges and into corners.

Easy to use, easy accessories

Reach every area easily by configuring the vacuum cleaner to your needs. Effortlessly turn the stick in a handheld and click on one of the accessories with LED guide. So, you can see every little bit of dust while cleaning. Use the pet nozzle for picking up long and fine hair, upholstery tool for cleaning every curve of your sofa. The long crevice tool and 2-in-1 combination tool helps to reach narrow spaces and clean tricky corners. With soft brush you can easily dust delicate surfaces.

Swap battery, clean for longer

Get the job done in one go! In one charge Philips 7000 Series cleans more than 360 m² in Eco mode and more than 135 m² in Turbo mode(3). Even in Turbo setting you can clean the entire house. Extra batteries and a fast charger (XV1797) are available as an accessory to double this coverage.

Easy control with LCD display

The digital display enables you to control the device and gives all information you need during and after your cleaning session. Adjust the brightness and speed easily via the display. If filter is full, you will get notification. Pretty smart.

Click-on aqua module

Why not do a quick wet touch up while you vacuum for a more thorough overall clean in one go? Our easy-to-attach and remove Aqua Module uses a damp microfiber cloth to remove a variety of stains while you vacuum.

Anti allergy filter system

Enjoy better air quality at home thanks to our anti allergy filtration system filter capturing over 99.9%(9) of pollen, pet hair, dust mites and other fine dust particles inside, creating a healthier environment for people with allergies. And for everyone! Extra replaceable filter (XV1681) is already available in the box.

Designed to last

Reliable vacuum cleaner, designed and built for powerful cleaning sessions over time. 2 years guarantee. IF design award winner 2024. DEKRA certified. This product contains recycled plastic. For every thousand Philips Cordless Vacuum Cleaners sold, we reduce the use of virgin plastics as much as 1,647,500 plastic straws.
